STEM PROJECTS FOR APRIL

WEEK 1

At Easter time we see a lot of jelly beans. Can we make a jelly bean tower or a pyramid? What can we make? Let's see.

WEEK 2

On windy days it's fun to fly a kite. We don't have kites here at school. Could we make one that flies? Let's try it out.

WEEK 3

How does rain form? Where does it come from? The kids will do an experiment to see if they can make it rain in a cup.

WEEK 4

The class will talk about the nursery rhyme "Humpty Dumpty" and about gravity. Could Humpty Dumpty use something to protect him from his fall? What could we make? A parachute perhaps? The kids will experiment with a homemade parachute.

PRESCHOOL STEM CHALLENGES
